

Call for Papers

National Conference on Pattern Mining (NCPM 2013) **May 11-12, 2013** **Department of Computer Engineering, MNIT, Jaipur**

In the era of voluminous and rapidly growing data, pattern mining requires to have stable and efficient data mining and knowledge discovery algorithms. This conference will bring together researchers and professionals working in the area of Data Mining, Pattern Recognition, Semantic Web and Soft Computing and related fields.

Topics of Interest

NCPM 2013 calls for national contributions related to foundations, challenges and research opportunities raised by real-world learning and pattern mining problems in which the data as well as patterns are complex, evolving and heterogeneous. The goal of the conference is to promote and publish research in the field of complex pattern mining. Suggested topics include (but not limited to) the following:

- Pattern mining, pattern usage, and pattern understanding
- Mining stream, time-series and sequence data
- Mining networks, graphs and trees
- Mining dynamic and evolving data
- Mining environmental and scientific data
- Mining heterogeneous data
- Mining multi-relational data
- Mining linked, social and web data
- Ontology
- Privacy preserving mining
- Semantic Web and Knowledge Databases
- Rough Set & Fuzzy logic Technique for data mining

Paper Submission Guidelines:

The manuscript, to be prepared in IEEE format and not to exceed four pages, must describe previously unpublished work, focusing on novel ideas, results and applications of the contribution. Submissions will undergo a blind review process: Papers exceeding the page limit, or disclosing the identity of the authors will be rejected without review.

All submissions should be made online, through the following EasyChair conference management system link:
